

E24

The E24 revives the essential TRIC 4" lateral bursting package that created the industry of trenchless home sewer replacement decades ago. Redesigned with price and practicality in mind, the E24 is geared primarily towards residential pipebursting jobs up to 4" diameter. Standard system includes a portable and extremely reliable 10K PSI electric pump, plus lightweight 5/8" compact swaged cable.* Suitable for indoor use, difficult backyard easements, and very tight spaces with limited access.

Pulling force:	24 tons @ 10,000 psi
Piston area:	4.81 square inches
Hydraulic input:	0.5–5 GPM
Cable capacity:	3/8", 5/8", 3/4"
Puller weight:	67 pounds
10" pulley base:	79 pounds
24" x 24" plate:	50 pounds
20" x 24" plate:	40 pounds
Power pack:	135 pounds wet, with optional dolly

* Cable diameter, construction, and condition combined with pulley wheel radius dictate the amount of safe pulling force available. Any TRIC puller can break any size cable it pulls. Consult with TRIC technical support for optimal use of your system. Specifications subject to change without notice.
